

JAGTAR SINGH – DP-900 Certified

DATA ENGINEER – Azure Cloud /DataBricks /Power BI Developer

EMAIL: luckycider.singh@gmail.com

Contact: +91 7888638903

Certified Azure Data Engineer with extensive experience in Azure, Databricks, Azure Devops, GitHub, SSRS. Proven track record of designing and implementing data solutions that drive business insights. Seeking an opportunity to leverage my skills and expertise to contribute to data-driven decision-making within a dynamic organization.

Experience:

Total 7+ years of Experience. In which 4+ years in Azure Data Engineering, Datawarehouse and ETL Building

TECHNICAL SKILLS:

- Azure Cloud
- Azure Data Factory
- DataBricks
- Pyspark
- Azure Synapse,
- Data Warehouse,
- Data Lake,
- Delta Tables
- GitHub
- Azure Devops
- SSRS
- Power BI
- SQL

DATABASES:

- SQL Server
- MySQL

PROGRAMMING LANGUAGES:

- Pyspark
- SQL
- Dax

VERSION CONTROL:

- Azure Devops
- Git

Education:

- B.Tech

PROFESSIONAL EXPERIENCE

PROTIVITI - SENIOR DATA ENGINEER - Nov 2021 – Present

- Using Azure ADF, Databricks, Pyspark for batch loads and preparing real time reports for business using delta tables, SQL-server tables feature.
- Implementing Azure-Key Vault to ensure proper security; interacting with multiple downstream partners on daily basis Customer service, Data Science, Analytics, Reporting Team to solve data related issues.
- Development of ETL/ELT Pipelines through DataBricks and ADF and populating Data in Ingest, Conform and Analytics layers.
- Development of ADF Triggers like Eventbased, scheduled Triggers.
- Development of Orchestration Framework through which system will identify and trigger the dependent pipelines.
- Developing generic ETL class and functions to manage multiple file-formats like parquet, csv, Json for data ingestion through ADF & Databricks; developing data pipelines in ADF to interact with multiple source systems ensuring smooth flow of large-scale data.
- Working with GitHub to manage & deploy code using Git through CI/CD.
- Development of Orchestration Pipeline, which will analyse the sequence of Pipelines and help them to trigger as per the dependent order.

OPALLIOS - DATA ENGINEER - Nov 2020 – Nov 2021

- Analysed, designed, and built data solutions for enterprise level businesses to support the visualisation of their data from various sources, to understand and determine the impact and risk of changing their business processes.
- Implemented Azure Architecture for enhanced data management and processing efficiency.
- Design and implementation of data ingestion pipelines, collecting diverse data from databases, files.
- Created 2 Power BI dashboards including Row level security.

AURITAS – POWER BI DEVELOPER - Feb 2015 – Nov 2020

- Worked independently as a solo developer, utilizing a technology stack that included SQL Server, and PowerBI.
- Created multiple Mobile Power BI Dashboards.
- Collaborated with business stakeholders to gather requirements and ensure the alignment of dashboards with organizational goals.
- Conducted training sessions for end-users on Power BI features and dashboard usage.
